How to use it

1. Print the pages on plain paper or light card, on A4 or Letter, as many times as you like.
2. Color the drawings in if you picked the line art strips, then cut along the dashed lines.
3. Bend a strip into a ring and glue the end marked glue under the other end, with the drawings outside.
4. Thread the next strip through the ring and glue it the same way, until the chain is long enough.
5. For the countdown, start with 24 and work down to 1, so that 1 hangs at the free end. From December 1, tear off one link each morning and do what it says.

Print tips

- A4 and Letter pages are both in this file; print the one your printer takes.
- Print at Actual size or 100% so the strips keep their length.
- The ready strips use plenty of ink. For black and white printing, use the strips to color in.
